In warly November 1952, leading officials of the Fisenacher "otoren erks In sarly November 1952, leading officials of the Fisenacher otoren erks (Lev), formerly the Bayerische otoren erks (3"), stated that the 1953 production clan for the clant would soon be changed. Only 1,000 to 2,500 Type-340 automobiles would be produced during 1953. Production of otor cycles, on the other hand, would be increased from 24,000 to 25,000. Of these at least 3,000 will be Type R 75 with 775 ccm. Diston displacement; the rest are to be Type R 50 with 500 ccm. In addition, production of four-wheel vehicles, with all-wheel drive, is to be started. These vehicles are of the same type as the Stocker KFZ 12, also called the G 5, which was produced for the German chapter during orld ar II. will also make individual narts for Russian army vehicles of the Studenker type. It has not not been determined how many four-wheel vehicles and sparts parts are to be produced in 1953. vehicles and spars marts are to be produced in 1753.
